Portfolio: https://www.jitenmohanty.in

Professional Summary

Full Stack Developer with production experience building scalable web platforms using **PERN, MERN, and Next.js** stacks. Specialized in **backend performance optimization**, containerized microservices with **Docker**, and secure enterprise authentication. Delivered measurable gains on AI-driven platforms serving **Fortune 500 FMCG clients including PepsiCo**.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, HTML5, CSS3, SQL (PostgreSQL)
Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs, Flask, FastAPI, Socket.io, WebRTC
Database: PostgreSQL, MongoDB, Supabase, Prisma, Drizzle ORM, Mongoose
DevOps & Cloud: AWS (S3, SES, EC2), Docker, Docker Compose, Redis, BullMQ, Grafana, Git, Linux
Tools & Frameworks: JWT, Zod, NextAuth, Stripe, Gemini API, Inngest, LangSmith, pgvector, Postman

Work Experience

Full Stack Developer Jul 2025 – Present
ShelfEx (Enterprise clients: PepsiCo) *Gurgaon, Haryana*

- Built core backend modules for **ShelfScan**, an AI-powered retail recognition platform serving **10,000+ users** across **10L+ stores**, processing **10,000+ daily image recognitions** with 95% accuracy.
- Reduced server **CPU utilization from 90% to 2%** by overhauling query execution plans, adding strategic indexes, and implementing **parallel database connections** – peak query latency now under 2s.
- Optimized the **image recognition pipeline from 30s to 10s** using **Worker Threads** and algorithmic code improvements.
- Containerized microservices with **Docker**; built background job pipelines with **BullMQ + Redis** handling 10k+ daily tasks via **AWS SES**.
- Improved page performance with **Next.js SSR/ISR** and optimized bulk data handling via **Node.js Streams**.
- Set up production observability with **Grafana** dashboards to monitor query latency, CPU usage, and job throughput in real time.

Full Stack Web Developer Sep 2024 – Jun 2025
Daya Consultancy Services *Bhubaneswar, Odisha*

- Built a **PERN**-based CRM with real-time dashboards, lead management, and secure **RBAC + JWT** auth with HTTP-only cookie sessions.
- Managed a multi-container **Docker Compose** setup (Node.js, PostgreSQL, Redis) with CI/CD on **AWS EC2**.
- Created a social media automation system with **OAuth 2.0** using Google, Facebook Graph, and X APIs.
- Cut REST API latency by **25%** using DB indexing and **Redis** caching.

Projects

AI Money Manager | *Next.js, Supabase, Prisma, Gemini API* GitHub | Live Demo

- Fullstack AI budgeting platform with automated serverless workflows via **Inngest**, secured with **Clerk** auth and **Arcjet** rate limiting.

AgentHub | *Next.js, Gemini Live API, Claude API, Prisma, pgvector, Stripe* GitHub | Live

- Built a SaaS platform where businesses create AI voice agents trained on their own data (menus, FAQs, inventory) and embed them as a widget — callers talk via **Gemini Live WebSocket**, leads are analyzed by **Claude Sonnet 4** and delivered in real time.
- Implemented **RAG** with pgvector (768d embeddings), **Stripe** billing with quota enforcement, **Inngest** durable background jobs, **HMAC-SHA256** signed webhooks, and **LangSmith** observability tracing.

Education

Biju Patnaik University Rourkela, India
Master of Computer Applications (MCA) | ***CGPA: 8.89*** *Graduated: 2022*

Utkal University Bhubaneswar, India
B.Sc. Mathematics | ***CGPA: 7.04*** *Graduated: 2019*
